Schell, R., see Lunt, T.	73
Shockley, W., see Lunt, T.	73
Straub, Jr., D. W., Organizational Structuring of the Computer Security Function	185
Summers, R. C. and Kurzban, S. A., Potential Applications of Knowledge-Based Methods to Computer Security	373
Thuraisingham, B. M., see McHugh, J.	387
Van der Bank, D. and Anderssen, E., Cryptographic Figures of Merit	299
Walker, M., see Mitchell, C.	483
Wiseman, D., see Carroll, J. M.	475
Witten, I. H. and Cleary, J. G., On the Privacy Afforded by Adaptive Text Compression	397

Subject Index to Volume 7

Access control, 271, 475, 563, 599
Acquaintances, 575
Active attacks, 65
Adaptive modeling, 397
Arithmetic coding, 397
Audit matrix, 271
Authorities, 575
Authorization, 287

Certification, 495
Computer security, 559
Computer security administration, 373
Computer security audit, 373
Computer viruses, 167
Contingency planning, 53
Consistency, 287
Control, 495
Cryptanalysis, 475
Crypto functions, 65
Cryptography, 299, 475, 483
Cryptosystems, 83

Database management system, 73, 271
Database protection, 59
Database security, 73
Data communication, 271
Data flow, 495
Data security, 483
DBMS, 287
Dial-back, 53
Dial-in access, 53
Dial-in security, 197
Digital diodes, 279
Disaster recovery, 47
Distributed database, 287, 387
Documentation, 53
DP operations restoration, 47

EDP audit, 197, 271
Electronic mail, 483
Encryption, 53, 397
Expert systems, 373
Exposure, 495
Figure of merit, 299
Finite state automata, 563
Formal security policy model, 73

Hacker, 197
Hierarchical placement of computer security, 185
Hierarchy, 599

Information networks, 279
Integrity, 65, 287, 409, 489, 599
Internal controls, 271

Kernel, 73, 575
Key management, 483
Knowledge-based systems, 373

Making available rights, 575
Management responsibility, 53
Manipulation detection, 65
Markov models, 397
Message authentication, 65
Multilevel security, 73, 387, 563

Navigation, 575
Network access, 53
Network controls, 53
Network file servers, 409
Non first normal relations, 575

Object-oriented programming, 575
Operating system, 271
Organizational structuring of EDP audit, 185
Organizational structuring of security, 185

Password selection, 475
Personal knowledge paradigm, 575
Policy, 559
Principle of control independence, 185
Privacy, 59, 575
Protection, 599
Public key, 83

Query modification, 575

Recovery planning, 47
Recovery plan testing, 47
Redundancy checks, 65
Reference monitor, 73
Refusal, 575
Relational database, 73
Relational data manipulation language, 575
Reliability, 563
Responsibility, 559

Scope of computer security, 559
Secure database management system, 73
Secure networks, 409
Security, 271, 299, 495
Security kernel, 73
Security model, 73
Security policy, 563
Security requirements, 563
Statistical database, 59
Surrogate, 575
Sustained adaptation, 397
System development life cycle, 271

Text compression, 397
Tiger team, 197
Training and awareness, 475
Transaction, 287, 495
Transmission integrity, 53
Trusted systems, 73, 409, 489

UNIX security, 475
User IDs and passwords, 53

Validation, 495
Verification, 495
Violation privilege, 563
